**ANNUAL UPDATE**  
**Shellfish Management Area 10B**  
**SCDHEC EQC Bureau of Water**

**Data Inclusive Dates:**  
01/01/03 thru 12/31/05

**Classification Change:**  
     Yes   X   No

**Shoreline Survey Completed:** No

**(I)ncreased/(D)ecreased/(N)one:**

**Prior Report & Date:** Annual -2005

  N   Approved  
  N   Cond. Approved  
  N   Restricted  
  N   Prohibited

**SUMMARY**

Shellfish Management Area 10B will remain Administratively Prohibited in its entirety. Historical and current uses of the upland areas within close proximity to Cooper River, Ashley River, and Charleston Harbor are not conducive for the sanitary harvest of molluscan shellfish for human consumption. The numerous point source discharges and miscellaneous activities that occur throughout the area prevent the Department from screening for all potential deleterious substances that could be present. Because of the large number of municipal and industrial discharges, the Shellfish Sanitation Program no longer monitors fecal coliform bacteria concentrations in Area 10B. Molluscan shellfish harvest for human consumption is not allowed in Area 10B

**BACKGROUND INFORMATION**

This sanitary survey evaluates the current harvesting classification of shellfish growing waters designated as Shellfish Management Area 10B (Area 10B). Area 10B consists of approximately 25,266 acres of shellfish growing area habitat located partially in both Berkeley and Charleston Counties, South Carolina. Area 10B consists of the Charleston Harbor and all creeks emptying into the harbor, the Cooper River from the harbor upstream to Woods Point and the Ashley River from the harbor upstream to Drayton Hall. The harbor is approximately four miles wide (northwest to southeast) and three miles long (southwest to northeast). Depths range from approximately 40 feet in the harbor's shipping channel to two feet near the shoreline. Due to minimal shoaling in the Ashley River, dredging occurs on an infrequent basis. The Cooper River, however, is routinely dredged due to occurrence of moderate to heavy shoaling. Freshwater flows into the area from both the Ashley and Cooper Rivers as well as from the Francis Marion National Forest via the Wando River. Overland runoff from rainfall also introduces additional freshwater into the area. High salinity ocean water enters the area from the mouth of the Charleston Harbor. The entire area is approximately 15 miles wide (northwest to southeast) and eight miles long (southwest to northeast).

There are no designated shellfish grounds within Area 10B. The shellfish-harvesting season in South Carolina normally extends from mid-September through mid-May. SCDNR has the authority to alter the shellfish-harvesting season for resource management purposes and grant permits for year-round mariculture operations. Additionally, the South Carolina Department of

Health and Environmental Control has the authority to prohibit shellfish harvesting when necessary to ensure that shellfish harvested in South Carolina waters are safe for human consumption.

## **RECOMMENDATIONS AND CONCLUSIONS**

Molluscan shellfish harvest for human consumption is not allowed in Area 10B. The shoreline survey review of shellfish growing Area 10B for 2006 indicate that the classification boundary descriptions are appropriate.

**Prohibited: (Administrative closure)**

1. The Charleston Harbor and all associated marshland;
2. The Ashley River and all associated marshland northward to Drayton Hall;
3. The Cooper River and all associated marshland northward to Woods Point

**Restricted:** None.

**Approved:** None.

**Station Addition/Deactivation/Modification:** None
